ROAD MAP

Goals

We already have our goals for the First Semester well defined. We will start with the launch of the contract at BscScan, going through the website, marketing and launching in the listings until the availability of the first season of NFTS.

Along with the initial goals, we set goals for a manual burning, which should proceed as follows:

The first NFT season, will be released in March 2022. In this first stage, the arts will only be collectible and can be highly valued for its rarity.

This action, will be carried out to capitalize a part of the project, being necessary a partnership with an NFTS marketplace platform making it feasible to carry out the stage.

Partnerships are always welcome, and can happen if it's good for the community.

The goals for the Second Semester are also defined, as follows:

- 20.000 Holders
- Marketing
- Project Consolidation
- Season two NFTs

The second stage of the project has as its flagship the development of the second season of NFTS which will already have their uses defined.

The Farm platform for Token and NFT holders.

This phase, is still under development and will likely be launched in the last month of 2022.

The Marketplace launch, will take place after the Farm's consolidation phase and will be developed for NFTS Puppets owners and also for partners to exhibit and sell their work.

After full development of the first goals, the project will be studied again and with the arrival of MetaVerse, Puppets Arts will be included in this new era of Cryptography. The world's first digital art exhibition at metaverse.

Metaverse

Puppets Arts, intends to join MetaVerse in a completely new market, that will consolidate in the coming years.

This futuristic MetaVerse market that intends to unite the real world with the virtual can be very viable for our encryption. The potential is huge, and we intend to be part of it.

Puppets Arts aims to be one of the first NFTs to have an exhibition on the Metaverse.
